HYBRID BLUEBERRIES

Look at these berries!

Photograph is life-size. Light blue color.

Needs only an acid soil

Blueberries require an acid soil containing peat or other rotted vegetable matter. They need a moderate supply of soil-moisture, and good drainage so that the roots can get air during the growing season.

Huge new berries in July on neat, ornamental bushes.

	(Each)	(10)	(100)
2 year (6 to 12 in.)	\$.90	\$ 6.00	\$47.50
3 year (12 to 15 in.)	1.15	8.00	57.50
3 year (15 to 18 in.)	1.50	9.50	67.50
4 year (18 to 24 in.)	1.75	12.50	95.00

Rubel. Vigorous. Large blue berries in July.

Rancocas. Slender, upright bush. Berries larger than Rubel, a few days earlier.

Concord. A large bush with huge berries of fine flavor. Early July.

Jersey. The largest bush, also the largest berries. Vigorous. Light blue.

Cabot. The earliest. Broad, low bush. Delicious berries.

A 4-foot hedge, about 6 years after planting the 15-18 inch plants in photo below.

UPRIGHT HARDY YEW HEDGE

(*Taxus cuspidata capitata*)

TREE FORM Hardy Yew (*Taxus Cuspidata*) is undoubtedly the best hedge plant for north-eastern America. It responds to shearing with a dense even textured surface. It grows fairly rapidly the first few years and then slows down to a yearly growth which permits it to be kept easily around 6 to 8 feet high and 3 to 4 feet wide.

Stabler

Thomas

English Walnut

BLIGHT-RESISTANT CHESTNUTS

Chinese Chestnut (*Castanea mollissima*). Similar to the dying American, of fine flavor, and sweet. It is inured to the Chestnut blight. Lives and bears Zone V.

	(10)	(100)
2 to 3 ft. (transplanted, sturdy).....	\$9.00	\$60.00

—**Grafted Trees.** Still better nut-bearing. Bear about as soon as apples. We strongly recommend these. Varieties Carr, Zimmerman, Hobson, and Conn. Yankee.

BLACK WALNUTS

One of our most beautiful native trees, growing well in any fertile well drained soil. The grafted sorts bear their first nuts commonly in the third to fifth year.

Stabler meat falls out easily in halves or one piece and is of a rich mellow flavor. A fine spreading specimen.

Thomas is a rapid-growing tree. The meat is attractive and tasty, but does not crack as easily as the Stabler.

A Hedge of Hemlock

Hemlock hedges (*Tsuga canadensis*) when properly sheared give a fine, even, smooth dark green surface unlike any other hedge. The plant thrives in soils ranging from ordinary to damp, and from full sun to full shade, hence is easy to grow. Set plants 1½ feet apart.

Evergreen Seedlings ("S")

Should be planted about four inches apart in beds. Here they are left two years and for the first year, during the heat of the first Summer, should be shaded by a lath screen.

Transplants ("X")

Evergreens that have been moved, or have had their roots pruned, form a close compact ball of fibrous roots. To be planted out in the open field in rows.

Small Deciduous Trees

Deciduous trees and shrubs need pruning back upon planting. With deciduous shrubs cut to the ground upon setting them out. Trees with a single stem: prune off side twigs when planting, and then a month later go over the planting again and cut away all but one single stem.

THE YEAR AFTER PLANTING, these little Pines were about 1½ feet high, twice transplanted, and cost about 30c each.

TWENTY YEARS LATER the photo taken near the same place shows a young forest. Trees are 25 to 30 feet high. Worth \$50.00 or more each!

YOUNG ARISTOCRATS

UNUSUAL and rare varieties . . . true-to-name because they are grafted . . . easy to grow because they have already passed a season out-of-doors. No winter protection is needed, nor other special treatment. All Balled and Burlapped for still easier handling. (Except items marked B. R.) This is an amazing opportunity to plant rare and delightful evergreens, trees, and shrubs at little cost. (Weight 1 to 3 pounds each.) F.O.B. Long Island.

Start Your Own Nursery

Wise old gardeners, you will notice, always have a few rows of trees and shrubs growing for future plantings. Even if your garden is now planted with ordinary background shrubs and specimens, why not set aside among your flowerbeds enough space here and there to plant a young aristocrat? In a few years, when larger, it can replace an inferior shrub and:

1. Save Money.
2. Save Delays.
3. Save Disappointments.
4. Save Transportation Costs.
5. Culture Not Difficult.
6. Rare and Interesting Varieties.

GABLES HARDY HYBRID AZALEAS

A collection of new hybrids of diverse parentage as showy as Kurume Azaleas, but really hardy in Zone V. Most are deciduous or partly so, but two are thoroughly evergreen in the North. We prophesy enormous popularity for this achievement of one of our foremost American hybridists—Mr. Joseph B. Gable—who has been laboring on them over ten years. Bloom from early May to June.

(Each) (6)

1 year 3 to 6 inch..... \$3.75
2 year 8 to 12 inch B&B..... \$1.50 7.50

Caroline Gable—Double, pink. Startling.

La Lumiere—Bright red. Shapely. Evergreen.

Mildred Mae—Broad, dwarf. Orchid, red-spotted. One of the best evergreen Azaleas.

Miriam—Early deep pink. Profuse.

Old Faithful—Early, deep orchid. Large grower. Good bloomer.

Those disappointed last spring will do well to order now. A larger stock available but still larger demand.

SMALL RHODODENDRON FROM CUTTINGS

Left: Gable Azalea; Right: 2-Year Named Rhododendron Cutting.

Named Hardy Hybrids

Here are the first named Hybrids to be commercially offered from cuttings. It is a special process which results in a well-budded growth, quick and full of vitality. In our opinion a 1-year field grown plant makes as vigorous branched growth as a 1-year old graft! Also, it is own-root and should prove slightly hardier in the north than grafts. F.O.B. Maryland, dug with small ball of earth.

This special "Young Aristocrat" grade measures 12 to 15 inches with a small ball, weighing one or two pounds only. This stock is not to be compared for a minute with ordinary collected plants. It is on the contrary all carefully dug, the greatest pains being taken to preserve the roots. Carefully packed, it is easily planted and makes a quick start. Shipped from North Carolina, yet express runs only about 6c each (in 100 lots).

BARGAINS IN LARGER SHADE TREES

THOSE who want quick results yet not have to pay for full specimens can here select from the best kinds of trees at enormous savings. We offer nice, well-rooted, transplanted stock between 4 and 8 feet high. They are young and transplant more easily and grow more vigorously than older stock. Yet you save 2 to 4 years over small seedling sizes at little extra cost. Packing included if cash accompanies your order.
